

WISCONSIN AUTOMATION COMPANY SELECTS CFS TO SUPPLY FM4910 PRODUCTS

CHANHASSEN, MN (May 25, 2006) - Custom Fab Solutions, LLC (CFS), a custom plastic/metal fabricator and systems integrator serving technology industries, is fabricating a variety of parts which will be used in medium and high voltage power distribution panels.

"This new customer selected CFS to fabricate a variety of custom shields using a FM4910 material that they in turn will use to manufacture custom power distribution products," said Bill Braunwarth, CFS director of sales and marketing.

The customer was referred to CFS by one of its suppliers. "We are especially pleased when we receive new business based on a word-of-mouth recommendation," said Braunwarth.

This order is an example of how CFS' expertise supports a company whose goal is to provide superior technology to its own customers whose products must perform in the most demanding manufacturing environments. "The company appreciates suppliers who can deliver cost-effective, results-based solutions," said Braunwarth. "At CFS, our focus is to provide solutions like this for all our customers." CFS expects to receive follow-on orders from this initial order.

About Custom Fab Solutions. CFS is a Minneapolis-based fabricator of plastics, Teflon® and PFA. The company offers metal fabrication, electro-polishing services and is a systems integrator serving technology markets. The company combines its capabilities with its customers' needs to integrate customer-specified instrumentation and controls into a ready-to-use product. CFS primarily serves the semiconductor, disk drive, electronics, medical, pharmaceutical and aerospace industries, where precision and contaminant-free material/products are required.
