

CFS INTRODUCES CHEMICAL COLLECTION SYSTEMS

CHANHASSEN, MN (March 27, 2009) - Custom Fab Solutions, LLC (CFS), a contract manufacturer and custom plastic/metal fabricator serving technology industries, announced the introduction of chemical collection products for industrial and bio-pharmaceutical industries.

The systems are designed for gravity-fed or pumped collection of aqueous or solvent chemical wastes. The product is self-contained and can accommodate up to two 200 liter drums for collection of waste chemical for off-site remediation. The PLC/HMI control system can be integrated into a factory monitoring system or operate as a stand-alone module with e-mail capability. Each system incorporates multiple safety features that protect personnel and facilities.

"This new product portfolio is an example of how CFS combines our process expertise and engineering talent to provide new solutions," said Bill Braunwarth, CFS Director of Sales and Marketing. "With our technical capabilities and design expertise, we are able to provide cost effective solutions for our customers. This coupled to our in-house fabrication and manufacturing capabilities is what clearly separates CFS from others."

About Custom Fab Solutions. CFS is a Minneapolis-based contract manufacturer serving technology markets. The company is vertically integrated and specializes in Teflon®, PFA and thermoplastic fabrication. The company has expertise in metal fabrication, electro-polishing and other surface treatment services. The company combines its capabilities with customer needs to integrate instrumentation and controls into a ready-to-use product. CFS primarily serves the photovoltaic, medical, pharmaceutical, semiconductor, disk drive, aerospace, food and electronics industries, where precision and contaminant-free material/products are required. The company web site is located at: www.CustomFabSolutions.com.
