

CFS UPGRADES ISO CERTIFICATION

CHANHASSEN, MN (May 29, 2009) - Custom Fab Solutions, LLC (CFS), a contract manufacturer and custom plastic/metal fabricator serving technology industries, announced it is now certified to International Organization for Standardization (ISO) 9001:2008 standard; previously the company was ISO 9001:2000 certified. The new certification complements the ISO 13485:2003 certification it received in November, 2007.

The ISO 9001:2008 Quality Management System (QMS) is an internationally recognized standard that ensures consistency and continuous improvement of working practices for products the company manufactures. The standard requires employee training, management assessment, and changes to procedures to meet the new rigorous standard.

The ISO 13485:2003 is an internationally recognized Medical Device Quality Management System standard developed by the ISO. To be certified to the 13485:2003 standard, the company must have Medical Device QMS procedures to document/confirm procedures to identify, manage and minimize risks involved with the manufacturing and sales of medical devices.

"Since becoming ISO 9001:2000 and ISO 13485:2003 certified in November 2007, and now being certified to ISO 9001:2008, CFS has become a stronger company," said Larry Vortherms, Vice President, Custom Fab Solutions. "Our customers are pleased CFS continues to consistently improve delivery and quality of products and services we provide." Mike Elftmann, President, Custom Fab Solutions said, "customer satisfaction continues to be our focus and quality is the foundation to achieving this result. CFS is committed to continuous improvement of processes that meet or exceed our customer requirements."

"BSI is committed to helping our clients achieve the most from their management system," said Todd VanderVen, President, BSI Americas. "By certifying to the ISO 9001:2008 standard, Custom Fab Solutions, LLC sends a clear signal it is a robust company, dedicated to excellence and understanding the demands of their clients."

About BSI Management Systems. BSI is a global independent business services organization that inspires confidence and delivers assurance to over 80,000 customers with standards-based solutions. Originating as the world's first national standards body, BSI has over 2,400 staff operating in over 120 countries through more than 50 global offices. BSI's key offerings are:
