

FOLLOW-ON ORDERS FROM FOOD MANUFACTURER DEMONSTRATES CUSTOMER SATISFACTION

CHANHASSEN, MN (January 30, 2009) - Custom Fab Solutions, LLC (CFS), a contract manufacturer and custom plastic/metal fabricator serving technology industries, announced receipt of multiple new orders from a Minneapolis-based food manufacturer that is a major supplier of hot and cold sandwiches to the U.S. convenience store industry.

The new orders are for a variety of products CFS designed, manufactured and supplied in 2008. CFS will use its in-house stainless steel machining and fabrication capabilities to provide tables, pass-through assemblies, storage carts and conveyer assemblies. To meet food safety requirements all stainless steel items will be passivated or electro-polished.

"These repeat orders serve as a clear example of total customer satisfaction in these difficult economic times," said Bill Braunwarth, CFS Director of Sales and Marketing. "Price, quality and quick-turn delivery is critical to the food industry as this market continues to invest in new equipment."

The company believes it will grow its market share in this industry by expanding product capability throughout the year and anticipates additional orders from existing and new customers through 2009 and beyond.

About Custom Fab Solutions. CFS is a Minneapolis-based contract manufacturer serving technology markets. The company is vertically integrated and specializes in Teflon®, PFA and thermoplastic fabrication. The company has expertise in metal fabrication, electro-polishing and other surface treatment services. The company combines its capabilities with customer needs to integrate instrumentation and controls into a ready-to-use product. CFS primarily serves the photovoltaic, medical, pharmaceutical, semiconductor, disk drive, aerospace, food and electronics industries, where precision and contaminant-free material/products are required. The company web site is located at: www.CustomFabSolutions.com.
