

CFS PROVIDES TECHNOLOGY SOLUTIONS AND QUICK-TURN DELIVERY FOR NEW GLOBAL CUSTOMER

CHANHASSEN, MN (July 27, 2006) - Custom Fab Solutions, LLC (CFS), a custom plastic/metal fabricator and systems integrator serving technology industries, was selected by an industry-leading manufacturer of controlled environment technologies to supply multiple sub-assemblies critical to a new product that will be announced in September, 2006.

"This was a quick-turn order, as we had to design, manufacture, assemble, test and deliver the products in five weeks," said Bill Braunwarth, CFS Director of Sales and Marketing.

The new customer, based in the Twin Cities, does business internationally, and has equipment located in over 60 countries, with 40 percent of the company's total revenue stemming from international sales and service. The company called on CFS to manufacture a stainless steel frame, a plastic and metal enclosure, a liquid dispense system and a material handling assembly.

CFS understands the dynamics of technology customers and the need to deliver product within a very short time period. "This is what makes our customer and CFS successful in today's markets," said Braunwarth. "We look forward to being this customer's number one choice to provide these products in the future."

About Custom Fab Solutions. CFS is a Minneapolis-based fabricator of plastics, Teflon® and PFA. The company offers metal fabrication, electro-polishing services and is a systems integrator serving technology markets. The company combines its capabilities with its customers' needs to integrate customer-specified instrumentation and controls into a ready-to-use product. CFS primarily serves the semiconductor, disk drive, electronics, medical, pharmaceutical and aerospace industries, where precision and contaminant-free material/products are required.
