

CAPITAL EQUIPMENT ORDER FROM ESTABLISHED CUSTOMER FOR SYSTEM INTEGRATION

CHANHASSEN, MN (February 14, 2008) - Custom Fab Solutions, LLC (CFS), a contract manufacturer and custom plastic/metal fabricator serving technology industries, announced it had received an order for 12 chemical systems. Nine (9) of the systems will be used in the Photovoltaic industry and three (3) in the Semiconductor industry.

The new order calls for CFS to design and build multiple products to customer supplied specifications. Under the contract CFS will manufacturer five (5) different products and supply as-built drawings. CFS will use in-house plastic and metal machining/fabrication, specialty welding, electro polishing, and system integration services to produce this order. The systems will be installed at Middle East and Southeast Asia end-use customer locations. Previous orders from this customer were for components and a variety of plastic and stainless steel assemblies.

“We received this order because of our design/engineering capabilities and our history of delivering product on-time and defect free at competitive pricing,” said Bill Braunwarth, CFS Director of Sales and Marketing. “This order further validates CFS’ capabilities to design and manufacture sophisticated products for technology markets and successfully compete with off-shore manufacturers’. We are very excited about this order and expect to receive additional orders for similar products in the near future.”

About Custom Fab Solutions. CFS is a Minneapolis-based contract manufacturer serving technology markets. The company is vertically integrated and specializes in Teflon®, PFA and thermoplastic fabrication. The company has expertise in metal fabrication, electro-polishing and other surface treatment services. The company combines its capabilities with customer needs to integrate instrumentation and controls into a ready-to-use product. CFS primarily serves the photovoltaic, medical, pharmaceutical, semiconductor, disk drive, aerospace, food and electronics industries, where precision and contaminant-free material/products are required. The company web site is located at: www.CustomFabSolutions.com.
