

NEW ASIAN AND U.S. CUSTOMERS EXPAND CUSTOM FAB SOLUTIONS' CUSTOMER BASE

CHANHASSEN, MN. – (Nov. 26, 2003) – Custom Fab Solutions, LLC (CFS), a custom plastic/metal fabricator and systems integrator serving technology industries, announced today that, with orders from several new customers for its recently introduced DI (deionized) water treatment module, the company's customer base continues to grow in Asia and the U.S.

Four new U.S. customers and two new Pacific Rim customers will use the recently introduced module as part of their manufacturing process to filter and control the amount of dissolved oxygen in DI water. Two of the new orders also included Custom Fab Solutions' air aspirator assembly, an optional accessory for the water treatment module.

"It is gratifying to note the customer feedback for these products' performance has been very positive," said Bill Braunwarth, CFS Director of Sales and Marketing. "They appreciate the fact that the easy-to-install system is cost effective and more importantly, meets their advanced process requirements."

As a result of the successful introduction of the water treatment module, CFS will expand the product's capabilities in 2004.

About Custom Fab Solutions. CFS is a Minneapolis-based fabricator of plastics, Teflon® and PFA. The company offers metal fabrication, electropolishing services and is a systems integrator serving technology markets. The company combines its capabilities with its customers' needs to integrate customer-specified instrumentation and controls into a ready-to-use product. CFS primarily serves the semiconductor, disk drive, electronics, medical, pharmaceutical and aerospace industries, where precision and contaminant-free material/products are required. The company web site is located at: www.CustomFabSolutions.com.
